

AMRITANSHU

Software Engineer — Full Stack

📞 6205013411 ✉ amritanshukaushal@gmail.com  linkedin  github
📍 Bengaluru, India  leetcode  gfg

Summary

Full-Stack Software Engineer with 1+ year of professional experience building **scalable web applications** using the Express.js. Proficient in RESTful API design, microservices architecture, and CI/CD pipelines. Experienced in delivering end-to-end features in Agile environments with a focus on performance, clean code, and system reliability

Professional Experience

WIPRO  , Developer-L1

06/2025 – Present | Bengaluru

- **Developed a full-stack web application** : Utilized Express.js and React.js to deliver scalable solutions serving 1,000+ daily users across multiple product modules
- **Built responsive UI components** : Utilized React.js component-based architecture to improve usability scores across 3 product modules
- **Developed 12+ RESTful API endpoints** : Utilized Express.js with JWT authentication, CRUD operations, and MySQL integration, reducing backend response time by 20%
- **Integrated frontend with backend services** : Utilized REST APIs and Axios to ensure seamless data flow between React and Spring Boot, reducing integration bugs by 30%.
- **Conducted end-to-end testing** : Utilized Playwright to identify and resolve bugs, ensuring reliable and consistent application performance
- **Followed version control and clean code practices** : Utilized Git, GitHub branching strategies, and modular architecture to maintain code quality across all projects
- **Collaborated in Agile sprint cycles** : Utilized Jira for task tracking and delivered features consistently within 2-week sprints across a 6-month project timeline

LTIMINDTREE  , INTERNSHIP

10/2024 – 12/2024

- **Completed hands-on training in Java Full Stack Development** : Utilized frontend, backend, and database technologies to build end-to-end web applications
- **Developed and maintained Java Spring Boot applications** : Utilized layered architecture (Controller, Service, Repository) to ensure clean, scalable, and maintainable code structure
- **Built and exposed RESTful APIs** : Utilized Spring Boot to design and implement APIs, validated HTTP methods (GET, POST, PUT, DELETE) using Postman
- **Resolved API response issues** : Utilized Spring Boot exception handling and @ControllerAdvice to fix incorrect status codes, missing fields, and improper error responses
- **Implemented pagination and sorting in API responses** : Utilized Spring Data JPA's Pageable interface to efficiently handle and retrieve large datasets
- **Tested and validated REST APIs** : Utilized Postman to verify endpoint behavior, request/response structure, and edge cases prior to frontend integration

Skills

- **Languages & Frameworks**: Java, Hibernate, Spring Boot, HTML5, CSS3, JavaScript (ES6+), Java, React.js, Node.js, Express.js,
- **Databases**: MongoDB, MySQL, SQL
- **APIs & Tools**: RESTful API Design, JWT / OAuth, Postman, Git, GitHub
- **DevOps & Cloud**: Docker (basic), CI/CD concepts, AWS (familiar)
- **Practices**: Agile/Scrum, SDLC, Microservices, Debugging, Code Optimization, Version Control, Component-Based Architecture

Education

Bachelor's of Technology (Information Technology),
Manipal University

08/2020 – 08/2024

Projects

SplitWise Clone (Full-Stack Expense Sharing App)

- Developed a **full-stack expense management application** to split bills and track balances between multiple users.
- Implemented **RESTful APIs using Node.js / Spring Boot** for expense tracking, user management, and settlement logic.
- Designed **dynamic UI using React**, enabling users to add, edit, and settle expenses in real time.
- Built core features like **balance calculation, expense history, and user-wise debt tracking**.
- Integrated **authentication and authorization** to ensure secure user access.
- Ensured efficient data handling using **MongoDB / MySQL**
